Anubhav Bajpai

Frontend Developer

About Me

As a final-year student at SRMIST, I have a solid foundation in C++ and strong programming skills. I'm actively expanding my expertise in web development, including HTML, CSS, and JavaScript, and currently learning React, a popular JavaScript library for dynamic user interfaces. My commitment to learning and passion for web development motivate me to explore new technologies and stay updated in this field.

Languages

- English
- Hindi

Extra Curriculum Activities

- Basketball

- 🗄️ SQL

Education

SRM Institute of Science and Technology - Kattankulathur

Bachelor of Technology : Computer Science and Engineering (2020-Present)

- Developed a Project Management System as a minor project.
- Configured computer networks using CISCO Packet Tracer.
- Successfully completed 300 C language programs.
- Explored digital electronic circuits using Multisim.
- Completed coursework in Computer Networks, Data Structures, and Operating Systems.

Sir Padampat Singhania Education Center, Kanpur , UP

High School Diploma: PCM with CS (2020)

Internship

Chakraborty and Lahkar Innovations Pvt. Ltd (Remote)

Front-end Developer (Mar 2023 - June 2023)

- Collaborated within a team to develop dynamic web application components.
- Incorporated new features and processes into the core software.
- Acquired proficiency in ReactJS and JavaScript by learning cutting-edge technologies.

Projects

Wokeye - The project management app

Created a Project Management application where one can create, delegate and monitor the tasks.

- I was responsible for crafting the user interface (UI) of the application.
- I designed and built React components while implementing Redux to manage the application's state effectively.
- Additionally, I played a pivotal role in creating Mongoose schemas and routes to establish backend APIs.

Spotter - HealthCare Website

Build a Healthcare application where one can

- View the current health status.
- I constructed the React components.
- I was responsible for designing and developing Mongoose schemas and routes to create backend APIs.

EMart - E-commerce Website

A e-commerce application where one can

- Purchase clothing items.
- Assembled HTML5, CSS3, and JavaScript elements.
- It is possible to observe current global trends.
